

Did You Know?

Lock out bears with required trash cans

Bear-resistant trash cans have been mandated for use in Sabal Point since 2018 to protect residents and help us coexist with wildlife. Household garbage and other food-contaminated waste, which are attractants for bears and other animals, must be placed in bear-resistant cans. The cans must be lockable, so if your trash can is damaged and no longer locks, it must be repaired or replaced. For tips on using and maintaining these cans and a list of approved containers, check Bear Aware Seminole.
